WHAT GOES UP

WON'T COME DOWN

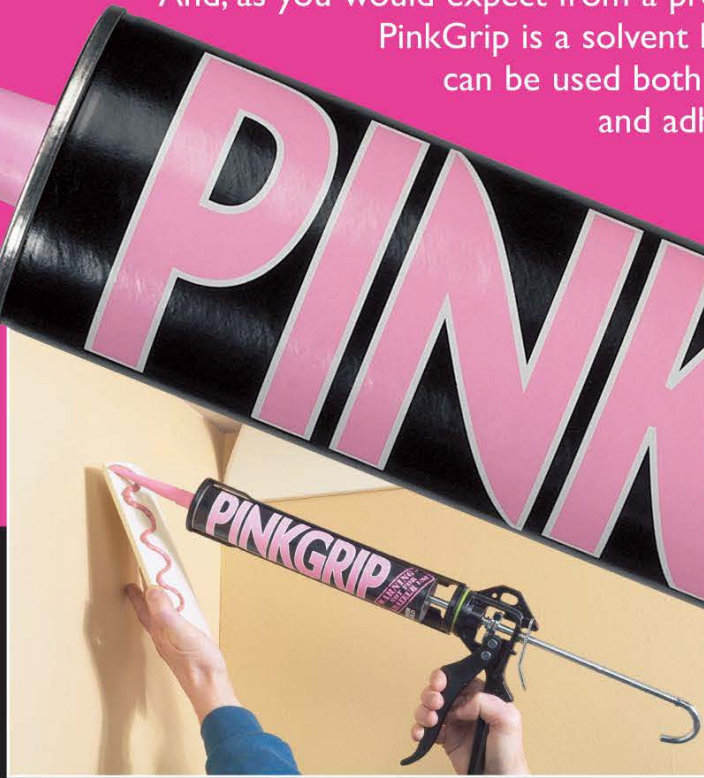

PINKGRIP - Probably the best "Direct Bond" adhesive ever produced for the professional

In tests PinkGrip out performs every competitor adhesive tested in the critical area of initial grab.

PinkGrip will stick just about anything on a building site that needs to be stuck. Its amazing grabbing strength not only removes the need to pin under the workpiece to prevent slipping or slumping, but its revolutionary initial 'Direct Bond' eliminates the need for double-stick methods.

And, as you would expect from a professional adhesive PinkGrip is a solvent based product that can be used both outside and inside and adheres to just about every building substrate.

GRIPS INSTANTLY NO SLIP, NO PINS
